

THE UNIVERSITY OF JORDAN

Physical health-care services at UJ

UJ provides comprehensive on-campus healthcare through its university hospital and student clinic, offering medical consultations, emergency care, vaccinations, and routine checkups. Regular health education campaigns and awareness programs promote disease prevention, healthy lifestyles, and overall physical well-being for both students and staff.

Students have access to a fully equipped clinic on campus, and if necessary, they are referred to the University Hospital, which is also located on campus. As for Staff, they are covered by comprehensive insurance at the University Hospital and can visit any clinic.
