Overview

Nuffic's Orange Knowledge Programme is a 5 year global development programme, aimed at strengthening professionals and organisations through education and training. It contributes to the goals of the Netherlands' development cooperation policy, in which education plays a significant role.

With its institutional collaboration projects (ICP) the Orange Knowledge Programme aims to support knowledge institutions in need of sustainable strengthening of higher and vocational education capacity, regarding local priority themes relevant to development cooperation. Support for vocational education and connection to the labour market are important principles. Institutional projects consist of various activities that contribute to institutional development of organisations in developing countries on three levels: individual, organisational and institutional. The Theory of Change (ToC) of the Orange Knowledge Programme presents the expected medium and long-term impact and outcomes of the programme. Each impact and outcome is quantified by a number of indicators which are described in the Orange Knowledge Programme Monitoring and Evaluation Framework and relates to the M&E Framework of Ministry of Foreign Affairs.
